

Apastata has more than 20 years of working experience which is the main asset of the company. Apastata is a DNV ISO certified organization, a member of Lithuanian Business Association and it has already earned its reputation as an experienced, responsible and reliable business company but it is always striving to improve and become a well-known construction company abroad. Apastata can offer a wide package of different construction services from general contractions to finishing works. Building specialists of the Company have great experience in new construction, reconstruction, renovation, internal and external finishing works so they can ensure the highest quality of timely provided services.

Apastata also specializes in manufactures of metal structures. It produces different steel frame buildings that are used in manufacture, agriculture and construction industries. It also offers traditional storage halls and shelters made from easy to assemble steel frame covered with PVC, tinplate or sandwich panels equipped with lighting, ventilation systems, fire escape and an automatic entrance door. Apastata has already built such storages not only in Lithuania but also in Norway and the Company is looking forward of working with clients abroad.

Apastata is always looking for new and better ways of acting in construction business. It is constantly searching for new products and services it could offer, new building materials and technologies it could use, new markets it could get into. Hence, wide experience and consistent striving for improvement and progress is the pledge of success of Apastata.
